Introduction

What is the Annual Statistical Report (ASR)

The Toronto's Police Service Annual Statistical Report is a comprehensive overview of police related statistics including reported crimes, victims of crime, search of persons, firearms, traffic collisions, personnel, budget, communications, public complaints, regulated interactions and other administrative information.

This report is one of several components of the ASR open data release. More detailed information, a comprehensive guide to this report and the rest of the components of the ASR can be found here: data.torontopolice.on.ca/pages/annualstatisticalreport

Source Data:

The crime related data contained in this report are derived from the Versadex records management system.

This system is continuously being updated and, as a result, some changes to statistics published in previous statistical reports should be expected.

Crime statistics contained in this report are based on the date that the information was reported or became known to police. This is done to minimize changes in reported statistics year over year and to enable some degree of comparability with statistics reported by Statistics Canada.

Other data comes from a combination of an automated and manual systems maintained by the individual units responsible.

Comparing Crime Statistics:

The Crime statistics in this report may be compared with previous Annual Statistical Reports however it is important to note that changes in methodology may occur over time.

The crime statistics in this report may not be directly comparable with crime statistics prepared by other agencies as differing methods of categorization, geographic, technical, data, and time constraints may affect comparability.

Detailed information pertaining to Statistics Canada crime reporting methodology can be found in the Uniform Crime Reporting Survey documents posted on the Statistics Canada website, <http://www.statcan.gc.ca>.
